Index of Abstracts

Volume 6 (1985)

Abe, Kinetsu and **Magid, Martin.** *Relative nullity foliations and indefinite isometric immersions,* 195.

Abhyankar, Shreeram. *Characteristic pairs,* 184.

Abian, Alexander. *Simultaneous construction of similar matrices and the similarity transformation,* 122. *An inner product and orthonormalization in l^p-spaces and solutions of infinite systems of infinite linear equations,* 312. *Compactness of the product topology revisited,* 418.

Abi-Khusam, Faruk F. *Functions with harmonic characteristic* (Preliminary report), 45.

Abikoff, William. *Kleinian groups—an invitation to mathematics,* 189. *Iterates of Teichmüller modular transformations,* 190.

Abrusci, V. Michele. *Dilators, generalized Goodstein sequences, independence results,* 459.

Aburto, L. *Gelfand spaces for orthogonal and unitary similarity groups* (Preliminary report), *411.*

Ackermann, Robert. *The impact of Hermann Weyl on philosophy,* 349.

Ackman, Bruce and **Owings, Jum.** *Cross products of Souslin trees,* 408.

Acrivos, Andreas. See **Milos, Frank S.**

Acuél, J. *Determination of all generalized Hicks-neutral production functions,* 342.

Adams, David R. *Maximal functions and L^p-potential theory,* 366.

Adams, M. E. and **Beaser, R.** *Congruence uniform distributive lattices,* 326.

Addington, Susan L. *Geometric dual reductive pairs* (Preliminary report), 469.

Addington, Susan L. and **Petersen, Troels N.** *Equivariant holomorphic maps associated to spin groups* (Preliminary report), 331.

Adler, Roy L. and **Flatto, Leopold.** *Geodesic flow and maps of the interval,* 284.

Adomian, G. *Approximate solution of nonlinear problems,* 61.

Aftabisadeh, A. R. and **Wiener, Joseph.** *On the uniqueness of solutions of nonlinear boundary value problems,* 55.

Agarwal, A. K. *Combinatorial proofs of some enumeration identities,* 140.

Ahangar, Resa and **Bogdan, Victor M.** *Existence of optimal control for generalized dynamical systems with a target state,* 259. *Existence of optimal control for generalized dynamical systems,* 294.

Ahlbrandt, Calvin and **Hooker, John.** *Disconjugacy of second-order linear difference equations,* 372.

Ahlers, G. See **Hohenberg, P. C.**

Ahlers, Guenter. See **Rehberg, Ingo**

Ahn, Hyun Joon. *Lower bounds for the eigenvalues of boundary problems,* 52.

Ahuja, Mangho. *Convex sets, homeomorphisms, and profiles,* 77.

Aiello, W., Subbarao, M. V. and **Hardy, G. H.** *On e-multiperfect numbers,* 482.

Aitchison, Iain R. and **Silver, Daniel S.** *On fibering certain ribbon disc pairs,* 243.

Ajtai, Miklos and **Gurevich, Yuri.** *Monotone versus positive,* 226.

Akis, Vladimir N. *Almost continuous extensions* (Preliminary report), *241. A class of acyclic planar continua which are not absolute quasi retracts* (Preliminary report), 315.

Akyildis, Ersan and **Akyildis, Yilmas.** *Rings of invariants of vector fields on G/B with a unique zero* (Preliminary report), *25.*

Akyildis, Yilmas. See **Akyildis, Ersan**

Alavi, Yousef, Chartrand, Gary, Lesniak, Linda and **Oellermann, Ortrud.** *Bipartite regulation numbers,* 9.

Al'ber, Mark. See **Al'ber, Solomon.**

Al'ber, Solomon and **Al'ber, Mark.** *Stationary problems for equations of KdV type and geodesics on quadrics,* 259.

Albert, Martin Kurt, Cavagnero, Michael, Roberts, Tom and **Spencer, Domina Eberle.** *The Bianchi identities,* 351.

Albrecht, Ulrich. *Endomorphism rings of abelian groups,* 175.

Alexander, Stephanie, Berg, I. David and **Bishop, Richard L.** *The Riemannian obstacle problem,* 80. *Cauchy uniqueness in the Riemannian obstacle problem* (Preliminary report), 383.

Alexanderson, G. L. and **Wetzel, John E.** *A simplicial 3-arrangement of 21 planes* (Preliminary report), 76. *A simplicial 3-arrangement of 22 planes,* 484.

Alladi, Krishnaswami. *An Erdös-Kac theorem for integers without large prime factors,* 19.

Allard, William K. *On the first variation of a varifold with respect to general integrands,* 212.

Allday, Christopher J. and **Puppe, Volker.** *Almost-free torus actions,* 90.

Allen, Roger W., Jr. *Constructing bijections: How it can benefit the undergraduate mathematics major* (Preliminary report), 116.

Allison, Dean. *Geodesic completeness in standard static space-times* (Preliminary report), 81. *Energy conditions in standard static space-times* (Preliminary report), 382.

Alpern, S. and **Prasad, V. S.** *End behavior and ergodicity for homeomorphisms of manifolds with finitely many ends,* 210.

Alspach, Dale E. *On $L_{p,\lambda}$ spaces for small λ,* 375.

Alvarez, J. and **Milman, M.** *Vector valued and maximal inequalities for strongly singular Calderon-Zygmund operators* (Preliminary report), 373.

Alvarez, Teresa, Gonzalez, Manuel and **Onieva, Victor M.** *A note on three-space Banach space ideals,* 261.

Ammar, G. *The numerical solution of Riccati equations and actions on flag manifolds,* 403.

Anastassiou, George A. *On the degree of weak convergence of a sequence of finite measures $(\mu_n)_{n\in N}$ to the unit measure δ_{x_0},* III (Preliminary report), 63.

Ancel, F. D. and **Siebenmann, L. C.** *The construction of homogeneous homology manifolds* (Preliminary report), 92.
